# EXP.NO: 5 - Reports, Dashboards, and UI Builder

## Aim

To create and configure reports, dashboards, and user interface components in Zoho Creator for the Hotel Room Booking System to view, analyze, and manage hotel booking information efficiently.

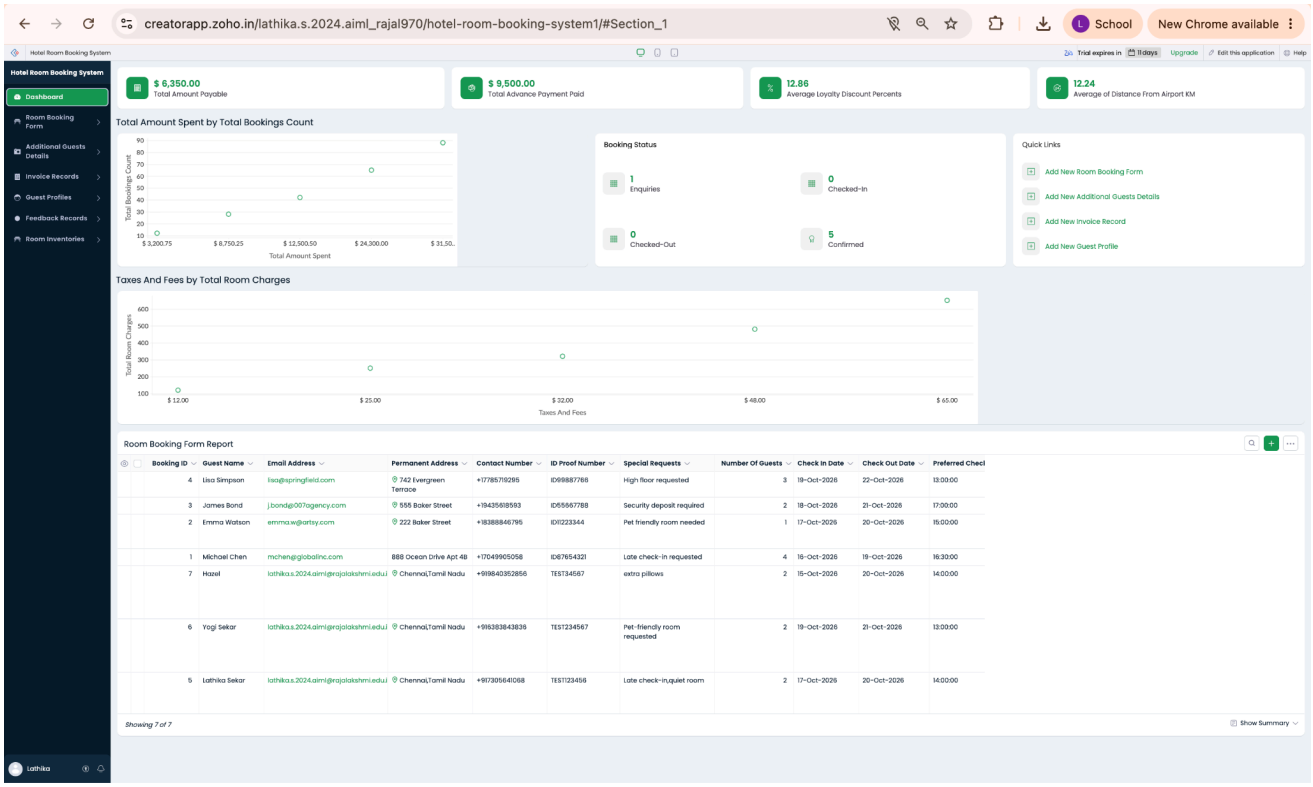

## Software Required

- Zoho Creator
- Web browser
- Hotel Room Booking System application

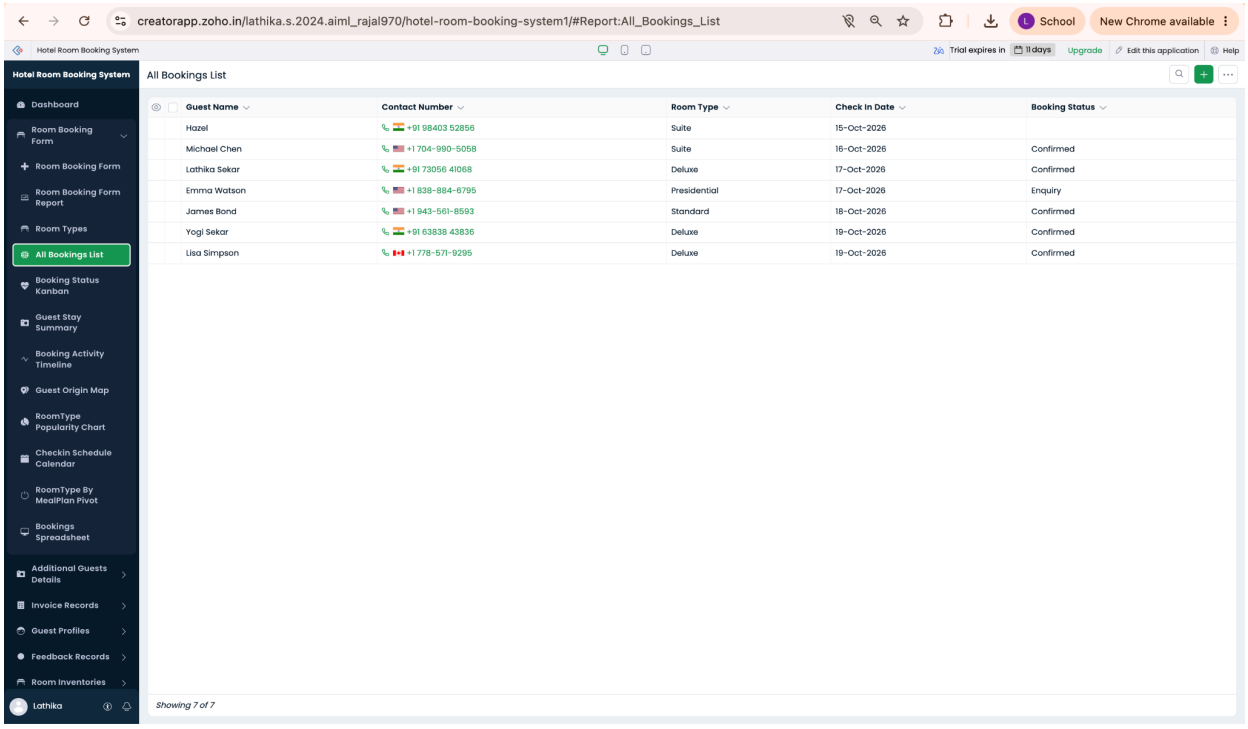

## Procedure

1. Open the Hotel Room Booking System application in Zoho Creator.
2. Create and configure reports using the existing forms and fields.
3. Create an All Bookings List report to display booking details such as Booking ID, Guest Name, Contact Number, Room Type, Check-in Date, and Booking Status.
4. Create a Bookings Spreadsheet report to view booking records in a spreadsheet format.
5. Create a Booking Status Kanban report to organize bookings according to their status.
6. Create a Check-in Schedule Calendar to display bookings by check-in date.
7. Create a Guest Origin Map to visualize guest locations where supported.
8. Create a Booking Activity Timeline to display booking-related activities.
9. Create a RoomType By MealPlan Pivot report to summarize room types and meal plans.
10. Create a RoomType Popularity Chart to visualize room-type popularity.
11. Create a Guest Stay Summary report to summarize guest stay information.
12. Design a dashboard containing charts, booking status summaries, quick links, and a booking report.
13. Test the reports and dashboard using the available booking records.
