Exp 9: AI and Analytics using Zia

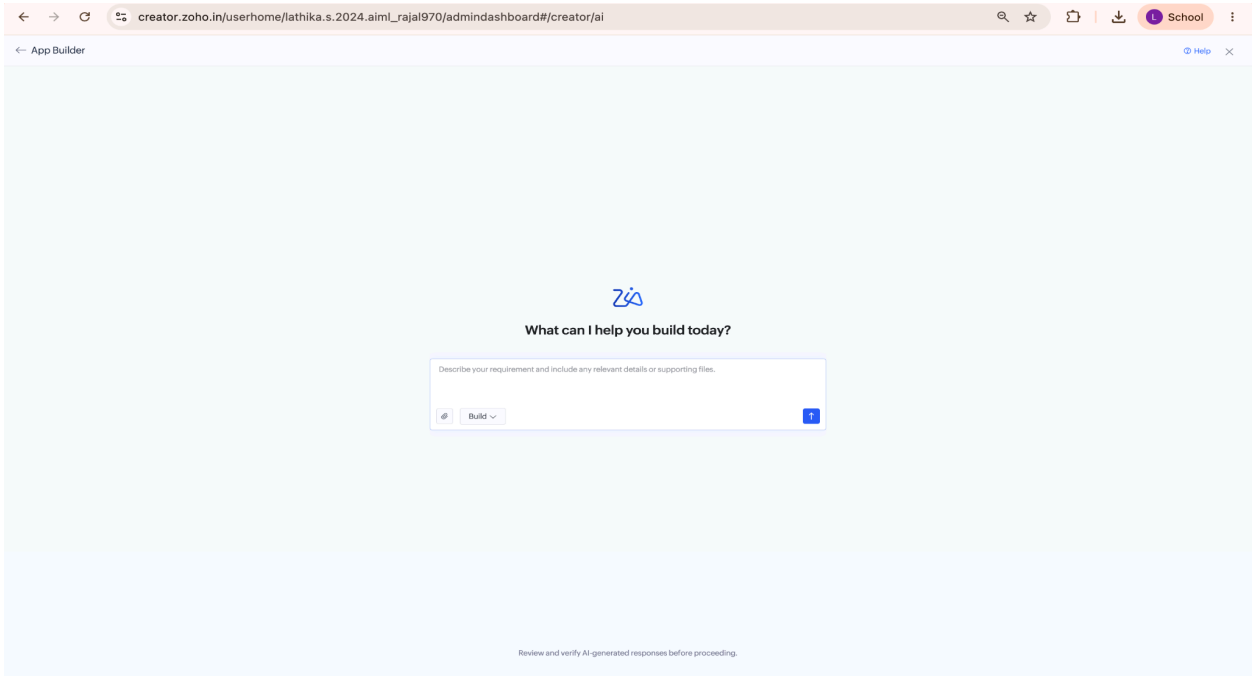

Aim

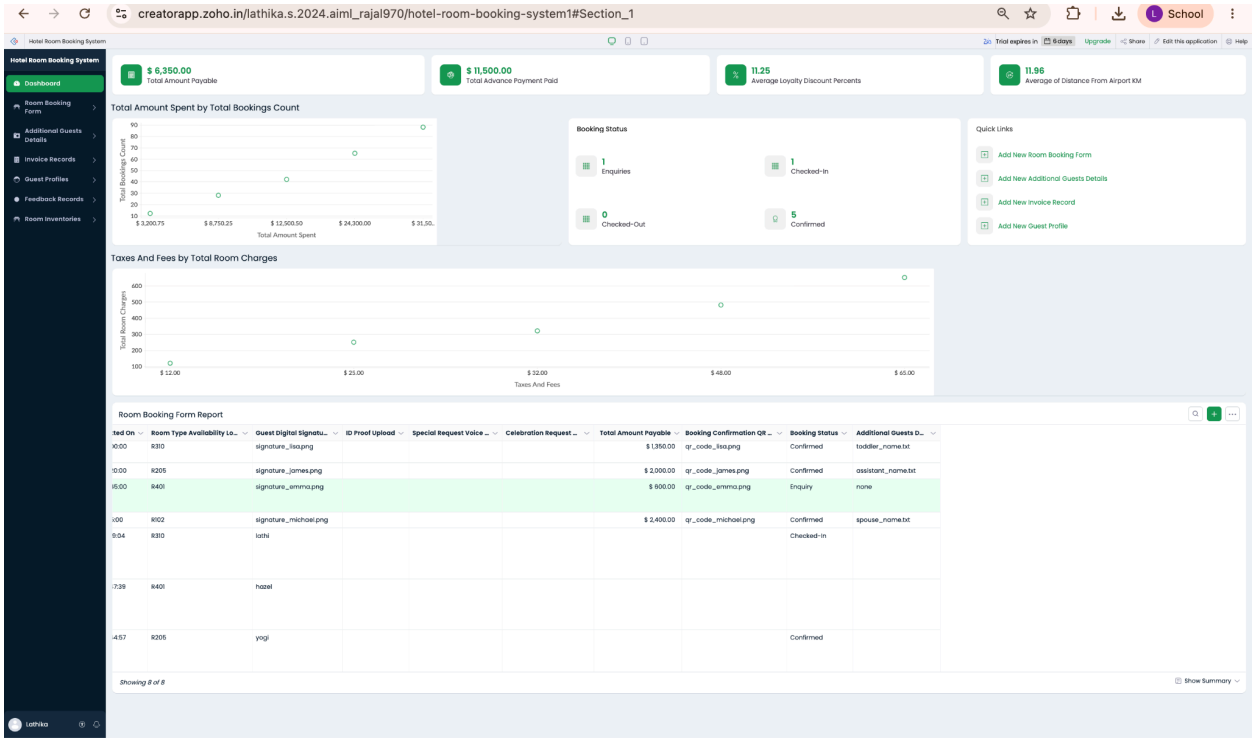

To explore Zoho Creator's Zia AI capabilities and use AI-powered analytics to gain insights from hotel booking and guest data.

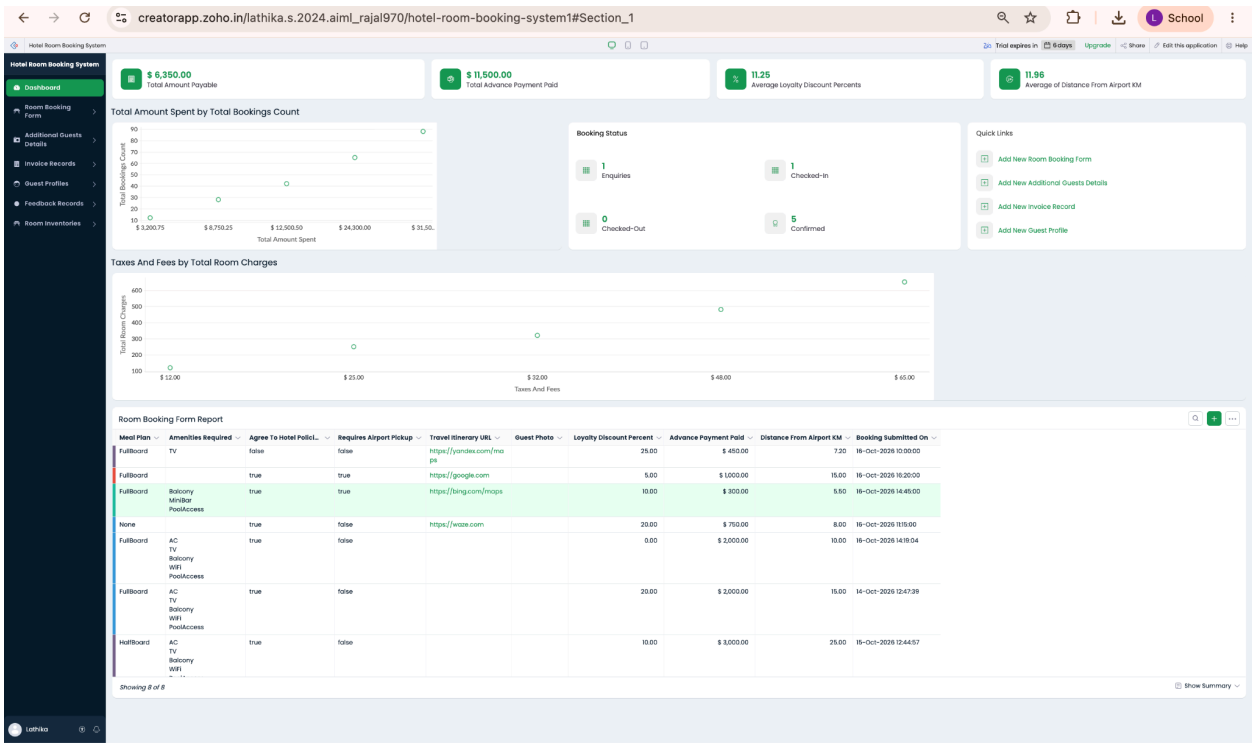

Procedure

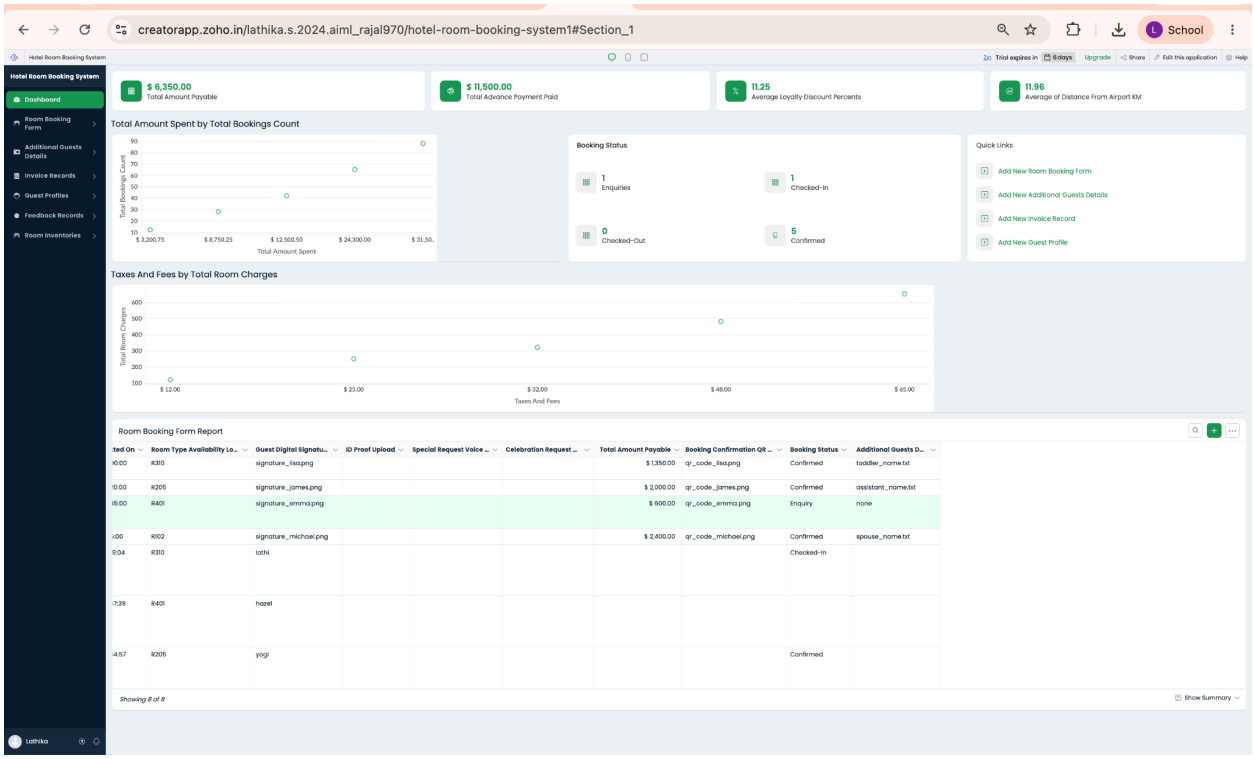

1. Open your Hotel Room Booking System application in Zoho Creator.
2. Navigate to the application’s Design section.
3. Explore the available reports and dashboards containing hotel booking, guest, payment, and room inventory data.
4. Locate the Zia or AI-assisted features available in your Zoho Creator account.
5. Explore the available options for generating insights, analyzing data, or creating reports using natural-language prompts.
6. If Zia supports your application and account, select a relevant report, such as the Room Booking Form report, for analysis.
7. Try a prompt such as: “Analyze hotel booking records and summarize booking trends by room type and booking status.”
8. Review the generated results and verify them against the available report data.
9. Save or capture the generated insights if the feature is available.
10. Record your observations and document the outcome.
